## Linisol Insulation BV

Linisol Insulation was the original core of the Linisol Group. In 1979 N. Deuzings established Linisol Insulation, the area of expertise of which was originally pipe insulation, both in the commercial as well as in the industrial market. Over the course of the past 30 years the company has established a firm reputation for itself in these markets in the areas of heat/cold, acoustic, fire resistant and architectural insulation.

The insulation activities of Linisol Insulation cover Limburg and Brabant in particular, but the Belgian and German markets are also part of the area in which we operate.

Linisol aims to offer its customers the broadest possible range of products, and to offer and perform all its services according to the full service concept vision in order to achieve the most efficient and clear coordination possible.

In addition to a broad range of insulation applications, Linisol offers asbestos clean-up, support constructions, scaffolding and demolition services.

**Linisol, your reliable partner for over 30 years.**
